

TO: Our Fellow Albertans

"A truly green energy future ... does not include nuclear power."

The Coalition for a Nuclear Free Alberta is seeking your support in our campaign to convince the Alberta Government that this province will do better to invest in clean, green, renewable energy alternatives, rather than in nuclear power.

The Coalition is comprised of several grassroots organizations from across Alberta, and we feel that the Government has not provided Albertans with a complete picture of our options for future energy sources. The Government has stated publicly that it intends to make a decision on the role of nuclear power in Alberta by the end of the fall sitting of the Legislature – apparently without even looking at the benefits of various sources of renewable energy.

The report prepared by the government-appointed "Nuclear Power Expert Panel" made comparisons between fossil fuel sources of energy, and nuclear power. Albertans also need to know the benefits of renewable energy sources, so **the Coalition for a Nuclear Free Alberta is calling on the Government to undertake another Expert Panel study or Task Force to assess the merits of truly green renewable energy sources** like small hydro, geothermal, bio-fuels, wind, solar, and greater energy efficiency.

The Coalition invites you to join our movement by wearing a Green Ribbon in support of a green energy future, and to encourage all Albertans to choose a truly green energy future ... without nuclear power.

The people of Alberta deserve to have a voice in choosing which energy sources we will invest in, and to do so, we require more credible information than has been provided to date.

We openly question why there is such a rush to develop a provincial policy on nuclear power without first considering all other options. Our research indicates there is presently no need for nuclear power to be fast-tracked into Alberta.

Therefore, we also ask you to **join us in a province wide Rally at the Alberta Legislature at 12:30 pm on Tuesday, October 27**, to help us deliver our message to the Government.

Sincerely,

Handwritten signature of Adele Boucher Rymhs in black ink.

Adele Boucher Rymhs, President
Coalition for a Nuclear Free Alberta

PLEASE HELP SUPPORT OUR GREEN RIBBON CAMPAIGN

To learn more about the movement, or to link with a member group of the Coalition for a Nuclear Free Alberta, please go to our website – **www.keepalbertanuclearfree.com**. Donations will be greatly appreciated and may be mailed to either:

COALITION TREASURER
BOX 570 –7620 ELBOW DRIVE S.W.
CALGARY, AB T2V 1K2

COALITION SECRETARY
BOX 1052, GRIMSHAW, AB
T0H 1W0

If you prefer you can contribute to the movement via "PAYPAL" on our website: – www.keepalbertanuclearfree.com.

Volunteers are needed to help build a truly green energy future in Alberta.
