

**"A truly green energy future ...
does not include nuclear power."**

Albertans have a choice.

Support a Green Energy Future for our province.
Truly green energy alternatives such as wind, solar, geothermal
and eco-friendly hydro combined with energy efficiency,
can safely meet all our future electricity needs.

Green power costs less to implement, creates more local jobs,
and is much less risky than nuclear power can ever be.

**Say NO to nuclear power, NO to radioactive contamination
and NO to a thousand year legacy of toxic nuclear waste.**

Protect our health, our environment, our water, our future and our pocketbook.
Please let your MLA know that **NUCLEAR POWER IS NOT THE ANSWER** for Alberta !

Go to www.keepalbertanuclearfree.com for more info about the campaign

**"A truly green energy future ...
does not include nuclear power."**

THANK YOU FOR SUPPORTING OUR GREEN RIBBON CAMPAIGN

Wear your ribbon to show that it is your wish that we 'Keep Alberta Nuclear Free'

Tell others about your support for a truly Green Energy Future.
